

Climate Resilience

Turning environmental risks into sustainable opportunities.

We support governments, communities, and businesses in designing and implementing robust climate-resilience strategies. Our approach blends science, policy expertise, and local context to reduce vulnerabilities, strengthen systems, and prepare territories for future climate impacts.

Key Areas

**Climate risk
assessment &
vulnerability
analysis**

**Adaptation
planning &
resilience
strategies**

**Monitoring,
evaluation &
learning**

**Institutional
capacity
building**
